Annex 1 of Inter-Ministerial Prakas No. 327 LV/PrK on Revision of Annex 1 of Inter-Ministerial Prakas No. 173 LV/PrK., dated 05 May 2016, on Provider Payment Methods for Health Care

CASE-BASED PAYMENT METHOD

This annex aims to determine the case-based payment method for health facilities signed the agreement with the National Social Security Fund (NSSF) for Health Care. The overview of this case-based payment method is provided in the table enclosed herewith.

1. Number and category of cases: (column 1 of the table) There are 52 (forty-nine) case groups in total divided into 5 (five) levels of care: Minimum Package of Activity (MPA) for health center, Complementary Package of Activity (CPA1) for referral hospital level 1, Complementary Package of Activity (CPA2) for referral hospital level 2, Complementary Package of Activity (CPA3) for referral hospital level 3, and NH for national hospital as stipulated in the Ministry of Health's Guidelines on Minimum Package of Activities (MPA) and Complementary Package of Activities (CPA).

2. Case code (column 2 of the table): A code of three consonants and one number is given to each case category. The three consonants are mostly the first three characters of the case name, which can be considered as abbreviated name of the case, whereas the number indicates the level of care: 0 = MPA, 1 = CPA1, 2 = CPA2, 3 = CPA3, and 4 = NH. The case code will be mainly used for ICT system to facilitate monitoring, evaluation, and reporting as well as claim and payment process.

3. Case name (column 3 of the table): The case name can be used in combination with the case code for monitoring, evaluation, reporting, and claim and payment purposes separately.

4. Case description/definition (column 4 of the table): The practical case description/definition allows the health facilities signed the agreement with NSSF to define and classify patients or health service users by case group.

5. Possible health conditions/diagnoses (column 5 of the table): The list of possible health conditions/diagnoses are put to support health facilities to easily identify or classify case names as well as an exercise aiming at implementing Diagnosis Related Group (DRG) in the near future.

Provided that this list of possible health conditions/diagnoses is not comprehensive yet, the health facilities can only refer to the practical case description/definition for cases whose medical condition/diagnosis do not match with the provided list of health conditions/diagnoses. Hospitalized cases (inpatients) will be defined at discharge (authorized discharged, referral or dead). For cases which are admitted and receive care from more than

one department (ward) during the hospitalization will be considered as a case which is the most expensive one.

For example, one case which is first admitted in emergency ward, then in surgical ward, and finally is operated should be considered as a case of major surgical intervention, and be paid accordingly for such case only.

6. Payment amount (column 5 of the table): NSSF shall pay the amount of money in Khmer riel to the contracted health facilities for each defined case. ⁽¹⁾In principle, this amount of payment will cover the cost of all provided medical and para-clinic services that the health facilities are compulsory to provide the medical care in compliance with professional guidelines and as stipulated in the benefit package defined by the Prakas on Health Care Benefit and the agreement between NSSF and the health facilities. However, this payment will not cover the cost of transportation (ambulance) and other para-clinic services in annex 2 in this Prakas. For private health facilities, NSSF can pay up to 150% of the cost of public health facilities based on the level of care of private health facilities. In such case, NSSF shall sign the agreement with the privates where there lack the public health facilities.

In practice, and for quality improvement purpose, NSSF has the right to pay less or more than the indicated payment amount (between 80%-120%) according to the level of quality of services to be measured or assessed with a reliable mechanism.

7. Classification of health facilities: In order to be able to apply this case-based payment method, NSSF needs to assess and classify each contracted health facility into MPA, CPA1, CPA2, CPA3, mixed level, or NH based on the scope and quality of services the health facility can provide. It is certified that a health facility can be classified in two or more levels (mixed level); e.g. for a health center with beds, its outpatient services can be considered as MPA level, while its inpatient care can be considered as CPA1 level. A CPA1 hospital which can provide major surgical interventions (operations), such operation services can be classified as CPA2 major surgical interventions and the rest is considered as CPA1 level.

A health center located in the compound of or under the management of a referral hospital should be contracted as an MPA facility if its services do not differ from others.

⁽¹⁾ Note that the current per case payment amount is calculated based on the average cost without government subsidies of some health centers and hospitals receiving for costing studies of health center and hospital conducted by the Ministry of Health, so far, and adjustment by level by taking into account of the financing prices and payment rates of Health Equity Fund.

No.	Case Code	Case Name	Case Description/Definition	Possible Health Conditions/Diagnoses	Payment Amount in Riel
1	CON0	MPA outpatient consultations	<p>New and follow-up outpatient consultations at a health center. The consultation services include:</p> <ul style="list-style-type: none"> - Interrogation - Physical exam - Medical education - Counseling - Consultation booklet - Para-clinic services (malaria rapid test and TB smear) - Treatment and prescribed medicines - Follow-up treatment of TB, DOTS, or leprosy is included in this case group. 	<ul style="list-style-type: none"> - Common cold - Uncomplicated acute respiratory infection - Diarrhea without severe dehydration - Uncomplicated malaria - Tuberculosis/leprosy or suspected and uncomplicated tuberculosis/leprosy - Uncomplicated typhoid fever - Acute conjunctivitis - Otitis media - Dental caries - Intestinal parasites - Sexual transmitted infection syndrome - Skin disease - Headache, fatigue, fever... of unknown origin - Uncomplicated hypertension. 	6,000
2	REF0	MPA emergency and referral or non-referral	<p>First aid and referral or non-referral services from a health center, including:</p> <ul style="list-style-type: none"> - Referral slip - Serum infusion - First aid services during referral - Other necessary monitoring excluding fee for ambulance or other forms of transportation. 	<ul style="list-style-type: none"> - Pneumonia/asthma - Chronic diarrhea or diarrhea with severe dehydration - Complicated malaria - Suspected severe pulmonary/extra-pulmonary tuberculosis - Complicated typhoid fever - Suspected dengue fever - Hypertension with complication/stroke - Complicated delivery - Drown - Shock - Convulsion - Coma - Bone fracture 	20,000

				<ul style="list-style-type: none"> - Severe burn or hemorrhage - Snake bite - Dog bite - Other insect bites causing life threatening - Other complicated medical conditions that the health center cannot provide. 	
3	MINO	MPA minor surgical activities	<p>Minor surgical procedures without hospitalization including:</p> <ul style="list-style-type: none"> - Local Anesthesia - Operation - Cleaning - Suture - Dressing - Treatment and prescribed medicine - Other necessary services for a minor surgical condition at a health center. 	<ul style="list-style-type: none"> - Cutaneous abscess - Minor wound - Mild burn - Treatment and cleaning of vagina or cervix. 	12,000
4	PREO	MPA short-term birth control service	<ul style="list-style-type: none"> - New and follow-up birth control (including counseling & modern contraceptive methods such as condom, pill, or injection) - Antenatal care consultation (including voluntary counseling & testing for HIV) - Postnatal care consultation - Post-miscarriage care - Vaccination at a health center 	<ul style="list-style-type: none"> - Antenatal care - Birth control - Postnatal care - Post-miscarriage care - Vaccination 	10,000
5	BSLO	MPA long-term birth control	<p>New and follow-up birth control including:</p> <ul style="list-style-type: none"> - Intrauterine device (IUD) - Birth control consultation at a health center. 	<ul style="list-style-type: none"> - Prolonged birth control 	30,000
6	DELO	MPA delivery	<p>Delivery and other necessary services including:</p>	<ul style="list-style-type: none"> - Normal delivery 	80,000

			<ul style="list-style-type: none"> - Serum infusion - Oxytocin injection as part of Active Management of the Third Stage of Labor(AMTSL) - Suture of episiotomy - Immediate newborn care and resuscitation - Immediate postnatal monitoring and care for a normal delivery at a health center 		
7	ON1	CPA1 outpatient consultations	<p>New and follow-up outpatient consultations, including referral consultations at a CPA1 referral hospital. The consultation services include:</p> <ul style="list-style-type: none"> - Interrogation - Physical exam - Medical education - Counseling - Consultation booklet - Para-clinic services (such as basic lab, echocardiogram, X-ray, and ultrasound) - Treatment and prescribed medicines - Emergency referral services for outpatients (excluding fee for ambulance or other forms of transportation) are also included in this case group. 	<ul style="list-style-type: none"> - Common cold - Uncomplicated acute respiratory infections - Diarrhea without severe dehydration - Uncomplicated malaria - Tuberculosis/leprosy or suspected uncomplicated tuberculosis/leprosy - Uncomplicated typhoid fever - Uncomplicated dengue fever - Acute conjunctivitis - Otitis media - Dental caries - Intestinal parasites - Sexually transmitted infection syndrome - Skin disease - Headache, Fatigue, Fever... of Unknown Origin - Other conditions that cannot be managed at health centers without the required hospitalization - Emergency referrals include: <ul style="list-style-type: none"> • Meningitis including tuberculosis meningitis • Encephalitis 	12,000

				<ul style="list-style-type: none"> • Miliary tuberculosis • Tetanus • Other emergency conditions (as indicated in EMG1) which require immediate referral. 	
8	MIN1	CPA1 minor surgical activities	<p>Non-hospitalized minor surgical procedures including:</p> <ul style="list-style-type: none"> - Local Anesthesia - Operation - Drainage - Cleaning - Suture - Dressing - Treatment and prescribed medicine - Other necessary services for a minor surgical condition at a CPA1 referral hospital. 	<ul style="list-style-type: none"> - Cutaneous abscess - Superficial abscess - Minor wound - Mild burn - Moderate myositis - Sebaceous cyst - Lipoma - Phymosis or paraphymosis circumcision - Tooth extraction 	20,000
9	EMG1	CPA1 emergency	<p>Intervention (medical and para-clinic services) and resuscitation of life and any parts of body of the patient or victim provided in emergency ward and required hospitalization at a CPA1 referral hospital.</p>	<p>Any medical conditions which require emergency resuscitation including:</p> <ul style="list-style-type: none"> - Drown - Respiratory distress - Shock - Convulsion - Coma - Severe burn or hemorrhage - Snake bite - Intoxication with gastric lavage - Traffic accidents (severe condition is required to monitor or hospitalize) - Other medical conditions with the required emergency services. 	120,000

10	MED1	CPA1 adult general medicine	Hospitalization includes necessary medical and para-clinic services for adults provided in medicine ward at a CPA1 referral hospital. Hospitalized surgical cases which do not require emergency care or referrals, such as burn or trauma, are included in this case group.	<ul style="list-style-type: none"> - Pneumonia - Severe bronchitis - Asthma - Pleural effusion - Pneumothorax - Pulmonary abscess - Severe or chronic diarrhea - Severe/complicated malaria - Complicated tuberculosis/leprosy - Typhoid fever - HIV/AIDS - Gastritis - Gastric ulcer - Cardiopathy - Septicemia - Diabetes mellitus - Hypertension - Arthropathy - Other medical conditions that require hospitalization. 	100,000
----	------	-----------------------------	--	---	---------

11	DEL1	CPA1 delivery	<p>Delivery and other necessary services including:</p> <ul style="list-style-type: none"> - Serum infusion - Oxytocin injection as part of Active Management of the Third Stage of Labor (AMTSL) - Vacuum extraction - Suture of episiotomy - Repair of cervix rupture - Immediate newborn care and resuscitation - Immediate postnatal monitoring and care for a normal or complicated delivery at a CPA1 referral hospital. 	<ul style="list-style-type: none"> - Normal delivery - Complicated delivery without the required caesarean section. 	100,000
12	GYN1	CPA1 gynecology	<p>Hospitalization included necessary medical and para-clinic services provided in maternity/gynecology ward at a CPA1 referral hospital.</p>	<ul style="list-style-type: none"> - Cervical cancer - Breast cancer - Severe cervicitis - Vagina wound or injury - Salpingitis - Endometriosis - Pelvic inflammatory disease - Other diseases related to urogenital system. 	100,000
13	ABO1	CPA1 miscarriage/abortion	<p>Legal induced abortion, necessary services for safe abortion, and post abortion/miscarriage care at a CPA1 referral hospital.</p>	<ul style="list-style-type: none"> - Miscarriage - Stillbirth - Unwanted or medically unacceptable pregnancy 	100,000

14	PED1	CPA1 child general medicine	Hospitalization included necessary medical and para-clinic services for children provided in pediatric ward at a CPA1 referral hospital.	<ul style="list-style-type: none"> - Pneumonia - Severe bronchitis - Asthma - Pleural effusion - Pneumothorax - Pulmonary abscess - Severe or chronic diarrhea - Severe/complicated malaria - Complicated tuberculosis/leprosy - Typhoid fever - Dengue fever - HIV/AIDS - Cardiopathy - Septicemia - Other medical conditions with the required hospitalization. 	92,000
15	TUB1	CPA1 tuberculosis	Hospitalization included necessary medical and para-clinic services provided in TB ward at a CPA1 referral hospital.	<ul style="list-style-type: none"> - All forms of pulmonary tuberculosis - Extra-pulmonary tuberculosis - Tuberculous meningitis, miliary tuberculosis, and leprosy with the required hospitalization. 	160,000
16	CON2	CPA2 outpatient consultations	<p>New and follow-up outpatient consultations, including referral and basic specialist consultations, at a CPA2 referral hospital. The consultation services include:</p> <ul style="list-style-type: none"> - Interrogation - Physical exam - Medical education - Counseling - Consultation booklet - Para-clinic services (such as basic lab, echocardiogram, X-ray, and ultrasound) 	<ul style="list-style-type: none"> - Common cold - Uncomplicated acute respiratory infection - Diarrhea without severe dehydration - Uncomplicated malaria - Suspected and uncomplicated tuberculosis/leprosy - Early detection of typhoid fever - Dengue fever - Acute conjunctivitis - Otitis media - Dental caries - Intestinal parasites 	160,000

			<ul style="list-style-type: none"> - Treatment and prescribed medicines - Emergency referral services for outpatients (excluding fee for ambulance or other forms of transportation) are also included in this case group 	<ul style="list-style-type: none"> - Sexual transmitted disease - Headache, fatigue, fever...of unknown origin - Diabetes mellitus - AIDS (ambulatory OI/ART) - Mental illness - Oral Health problem - Other conditions that cannot be managed at health centers or CPA1 referral hospitals without the required hospitalization - Emergency referrals refer to all emergency conditions (as indicated in EMG2) with the required immediate referral. 	
17	MIN2	CPA2 minor surgical activities	<p>Non-hospitalized minor surgical procedures including:</p> <ul style="list-style-type: none"> - Local anesthesia - Operation - Drainage - Cleaning - Suture - Dressing - Treatment and prescribed medicine - Other necessary services for a minor surgical condition at a CPA2 referral hospital. 	<ul style="list-style-type: none"> - Cutaneous abscess - Superficial abscess - Minor wound - Mild/moderate burn - Myositis - Sebaceous cyst - Lipoma - Phymosis or paraphymosis circumcision - Tooth extraction 	240,000
18	EMG2	CPA2 emergency	<p>Intervention (medical and para-clinic services) and resuscitation of life and any parts of body of the patient or victim provided in emergency ward at a CPA2 referral hospital.</p>	<p>Any medical conditions/diseases which require emergency resuscitation including:</p> <ul style="list-style-type: none"> - Drown - Respiratory distress - Shock - Convulsion - Coma - Severe burn or hemorrhage - Snake bite 	240,000

				<ul style="list-style-type: none"> - Intoxication with gastric lavage - Road traffic accidents (severe cases which require follow up and hospitalization) - Hypertension with complication/stroke - Severe chest pain - Tetanus - Acute pulmonary edema - Other medical conditions with the required emergency care. 	
19	SUR2	CPA2 surgery	Hospitalization includes necessary medical and para-clinic services provided in surgical ward (except cases of major surgical interventions as indicated in MAJ2) at a CPA2 referral hospital.	<ul style="list-style-type: none"> - Head trauma - Abdominal trauma - Chest trauma - Intra-abdominal hemorrhage - Liver abscess - Kidney stone - Bladder stone - Gallbladder stone 	150,000
20	MAJ2	CPA2 major surgical interventions	Major surgical interventions carried out in operation theater by using general anesthesia, rachis anesthesia, or local anesthesia, especially for emergency operations as well as pre-and-post-operation care including blood transfusion at a CPA2 referral hospital.	<ul style="list-style-type: none"> - Appendicitis - Hernia - Ectopic pregnancy - Ovarian cyst/tumor - Amputation - Ophthalmic surgery including cataract, eye injury - Caesarean section - Joint Dislocation - Sterilization by tub ligation/vasectomy 	400,000
